

*Seamless and secure data exchange  
between CMiC's Financials & PROCORE's Project Management*

**Bi-Directional Data Exchange for ENHANCED DATA ACCURACY & LIQUIDITY**

CMiC Financials for Procore allows users of CMiC and Procore software systems to map shared data objects—such as jobs, vendors, costs, subcontracts and change orders—across the two systems, while reducing redundant data entry and increasing accuracy.

- Actuals (JTD Costs/ MTD Costs)

Offering an enterprise-level integration for your existing project management solution, CMiC Financials for Procore supports key use cases. For example, cost codes in CMiC Financials can be mapped to cost codes in Procore. Similarly, writing a change order in Procore automatically reflects the change in CMiC Financials.
